

/home/michael/development  
/SSAGES/src/FileContents.h

```
graph TD; A["/home/michael/development  
/SSAGES/src/FileContents.h"] --> B["fstream"]; A --> C["string"];
```

The diagram illustrates a dependency structure. At the top, a gray rectangular box contains the file path `/home/michael/development/SSAGES/src/FileContents.h`. Two blue arrows originate from the bottom edge of this box. The left arrow points to a white rectangular box labeled `fstream`. The right arrow points to another white rectangular box labeled `string`. This indicates that the file `FileContents.h` depends on the headers `fstream` and `string`.
